SKILLS

Programming Languages

Proficient in: JavaScript, and TypeScript.

Working knowledge: Ruby, Python, MySQL.

Technologies

Proficient in: Vue.js, Nuxt.js, Node.js, Express.js, MongoDB.

Working knowledge: Vuex, Pinia, React, Next.js, Nuxt.js, Vite, Vitest, Jest, Cypress, Ruby on Rails, ESLint, Babel, Prettier, Git.

Services

Common Amazon Web Services, Basic Google Cloud Services, Heroku, Docker, Netlify, Vercel, Strapi, Firebase, Supabase, GitHub Actions.

WORK EXPERIENCE

PROFESSY INC., Japan | Software Engineer (Remote) | Mar 2021– Sep 2023

- I worked with a 6-person development team, focusing on creating and maintaining the company's flagship product, resulting in enhanced product performance and customer satisfaction.
- Built a SaaS application using Nuxt.js and TailwindUI. Created a complete full-stack workflow using Amazon Elastic Container Service and Docker.
- Technologies used: Nuxt.js, Angular, Coffee Script, Node.js, Express.js, Amazon Simple Storage Service, Amazon Elastic Container Service with Docker containers.

Myanmar Media Linkage Co., Ltd, Myanmar | Senior Software Engineer | Jul 2020– Jan 2021

- Maintained a music streaming web application, ensuring its continuous operation and enhancing user experience.
- Developed and maintained a Node.js API, serving as an essential internal tool for the PHP backend team. It is designed to send SMS to the customer of the music streaming web application developed by the PHP backend team.
- Technologies used: Vue.js, Node.js, Express.js, Amazon Simple Storage Service, and Amazon Elastic Compute Cloud.

Myanmar High Society Co., Ltd, Myanmar | Software Engineer | Dec 2017– Jan 2020

- Contributed to a 6 person development team as a Junior to build an order management project that used data from Salesforce by extracting Excel and PDF files.
- Worked on a web application project as a Node.js backend engineer to coordinate with the mobile development team and also lead the frontend team which heavily used the browser's canvas API to create and edit images imported by the user.

EDUCATION

Bachelor of Computer Science in Software Engineering

University of Computer Studies Mandalay, Dec 2009 – Dec 2012.

PROJECTS

[TweetsGen](#) | AI Tweets Generator

- TweetsGen is a dynamic and innovative project designed to simplify and streamline the process of generating tweet ideas effortlessly.
- Used by over 100 users over the last year.
- Built with Nuxt.js, and NaiveUI and hosted using RailWay.app.

[Path-finding Algorithms Visualizer](#)

- Built with Next.js.
- This project showcases the execution duration of fundamental computer science algorithms through an aesthetically designed maze user interface.
- It features adjustable execution speed controls to enable users to observe these algorithms in action.

CERTIFICATIONS

[Meta Front-end Developer](#) | 2023

- Developed a comprehensive understanding of front-end web development.
- Built a modern React app using Vite and designed its UI/UX using Figma from scratch.
- Learned the knowledge of the workflow of a modern front-end developer through guidance from a Meta professional.
